                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         cancer in a patient;
(d) assessing the efficacy of a therapy for inhibiting prostate cancer in a patient;
(e) selecting a composition for inhibiting prostate cancer in a patient;
(f) assessing the prostate cell carcinogenic potential of a compound;
(g) determining whether prostate cancer has metastasized in a patient;
(h) assessing the aggressiveness or indolence of prostate cancer in a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The invention relates to an isolated nucleic acid molecule (I) com a nucleotide sequence given in Tables 1-9 (ABV00010-ABV62213) of t specification or its complement (I) is useful for:

(a) assessing whether a patient is afflicted with prostate cancer;
(b) monitoring the progression of prostate cancer in a patient;
(c) assessing the efficacy of a test compound to inhibit prostate
                                                                                                                                                                                                              1060
                                                                                                                                                                                                                                                                                                  1000

Pred. No. 1s the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       GenCore version 5.1.4_p5_4578 Copyright (c) 1993 - 2003 Compugen Ltd.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 1, Application US/09782051
Patent No. US20020035078A1
GENERAL INFORMATION:
APPLICANT: Hart, Derek N J
TITLE OF INVENTION: Enzyme having S-adenosyl-L-homocysteine hydrolase
TITLE OF INVENTION: (AHCY) type activity
FILE REFERENCE: 24305 MRB
CURRENT FILING DATE: 2001-02-14
PRIOR APPLICATION NUMBER: PCT/NE97/00133
PRIOR FILING DATE: 1997-10-06
PRIOR FILING DATE: 1997-10-06
PRIOR FILING DATE: 1997-10-06
                                                                                                                                                                                                                                                                                                                                                                        PRIOR APPLICATION NUMBER: NZ 299507
PRIOR FILING DATE: 1996-10-04
